

Cloud Security Engineer with over a year of hands-on experience securing multicloud environments (AWS, Azure, GCP). Passionate about empowering global developer communities, I actively serve as an AWS Student Builder Group Leader and a Microsoft Student Ambassador. As a dedicated tech educator and speaker—including for Microsoft Hub en español—I create social media content that translates complex DevSecOps and cloud concepts into practical, real-world applications. I am driven by a commitment to architecting resilient infrastructure and sharing hands-on knowledge with the tech industry.

👤 Personal Information

E-mail: hi@andruudev.com
LinkedIn: Jeyson Mueses, @andruudev
X, Instagram, TikTok: @andruudev
Portfolio: <https://andruudev.com>

💻 Skills

Multicloud Architecture (AWS, Azure, GCP)	Identity and Access Management (IAM)
Cloud Security Posture Management (CSPM)	DevSecOps & Secure CI/CD Pipelines
Network Security & Threat Mitigation	Infrastructure as Code (IaC)
Shell Scripting (Bash)	Linux Administration & Terminal Environments
Tech Community Leadership	Python for Security Automation
Educational Content Creation & Technical Production	Technical Public Speaking & Mentoring
Hands-on Problem Solving & Adaptability	

🛠️ Tools

Amazon Web Services (AWS)	Microsoft Azure
Google Cloud Platform (GCP)	AWS IAM & AWS Security Hub
GitHub Actions (Secure CI/CD Pipelines)	Terraform (Infrastructure as Code)
Terraform (IaC)	Bash / Shell Scripting
Git	Docker
Linux	Python

🗣️ Idiomas

Español	●●●●●●●● Nativo
English	●●●●○○○ Nivel B2

📁 Projects

2025	Multicloud Security Posture Management (CSPM) Automation <i>AWS (IAM, Security Hub), Azure (Defender for Cloud), Terraform, Python.</i> - Developed an automated auditing solution using Python and Terraform to detect and remediate infrastructure misconfigurations across AWS and Azure environments. - Enforced continuous compliance with CIS Foundations benchmarks and automated the remediation of overly permissive IAM roles, significantly reducing the attack surface.
2025	Secure CI/CD Pipeline (DevSecOps) for Cloud Infrastructure <i>GitHub Actions, Terraform, AWS, Docker, Bash.</i> - Architected a secure, automated CI/CD pipeline leveraging GitHub Actions to deploy scalable cloud infrastructure while enforcing strict security gates. - Integrated automated vulnerability scanning (e.g., Checkov/Trivy) for Infrastructure as Code (IaC) and blocked the deployment of hardcoded secrets, establishing a robust DevSecOps workflow.
2025	Terminal-Based Cloud Threat Monitoring Dashboard <i>Bash, Python, AWS CLI, Azure CLI, Linux.</i> - Engineered a custom, lightweight CLI tool that aggregates real-time security alerts and logs from multiple cloud providers directly into a terminal interface. - Streamlined incident response and threat visibility for engineers working in terminal-first environments, bypassing the need for heavy web consoles and improving reaction times.

🎓 Educación

2025 | Desarrollo de Software - PUCE
Quito, Ecuador - Current

2024 | Bootcamp de Análisis de datos, Kruger Instituto Xponencial
Quito, Ecuador - Completed
